

City of St. Cloud Announcement

We are informing the public that City crews will be shutting down the reuse water service at US 192/Old Canoe Creek Road, including service to Toho Water Authority:

Tuesday, July 18
(starting at about 9 a.m.)
until late Wednesday, July 19

The affected area will be North of US 192, including and up to the lakefront.

This shutdown is necessary to assist in the Florida Department of Transportation's SR 500 (US 192) project. FDOT Contractor, Jr. Davis Construction, will be installing a deflection for the reuse main so that it does not conflict with the new storm pipe that will be installed during the week-long FDOT project.
